EXPERIENCE

IT Support & Network Security Engineer Intern

2022 - 2023

eProcess Consulting Limited

Lagos, Nigeria.

Cybersecurity Consulting Company

- Providing first-line client support ensured timely issue resolution, improving client satisfaction and allowing the team to prioritize critical tasks, thus increasing overall productivity.
- Establishing and managing a comprehensive IT inventory system streamlined the process of updating new devices, ensuring accurate tracking and efficient management of IT assets.
- By configuring and managing web policies with Sophos Firewall, I enhanced productivity for both clients and our company by minimizing distractions and ensuring focus on work-related tasks during business hours.
- By completing Sophos Firewall and Central courses, I ensured that our company maintained its top partner status in Nigeria, demonstrating our expertise and commitment to delivering the highest level of security solutions.

Web Developer

2024 - Present

Beyond Digital

Remote, Mauritius.

Digital Marketing Company

- Build, design, and optimize high-converting funnel pages and landing pages for clients.
- Create automated email sequences, set up autoresponders, and integrate CRM tools for lead nurturing.
- Set up Google Analytics, track conversions, and integrate third-party tools for performance insights.
- Optimize page speed and implement SEO best practices.
- Troubleshoot issues, update existing pages, and provide technical support to clients.

EDUCATION

Bsc Information Technology

09/2023 - 08/2024

Middlesex University Mauritius

Mauritius

Professional Diploma in Information Technology (Software Engineering)

2021 - 2023

NIIT

Lagos, Nigeria.

PROJECTS

Price Comparison Website

Built a Price Comparison Website of books using Java, multithreading, Selenium, Spring, Hibernate, JUnit, Express.js, MySQL, HTML, CSS, and JavaScript.

- Users can search for books by title or keyword on the website.
- Search results display books matching the search term, and users can click on the desired book.
- Users can then view a brief description of the selected book along with its prices from different websites.

ToDoList WebApp

Built a ToDoList app using HTML CSS JAVASCRIPT

- Create task
- Delete task
- Update task
- Filter tasks completed or uncompleted tasks
- Save to local storage
