Software Engineer focused on web development, building SEO-friendly WordPress, Elementor, and WooCommerce websites, plus GoHighLevel funnels & CRM automation. Delivered 15+ client sites, including Fillin (formerly Engen Mauritius), the Artemis Hospitals Mauritius network, and Prime Pillar Group, spanning healthcare, real estate, hospitality, and retail.

EXPERIENCE

Web Developer | Beyond Digital | Remote, Mauritius

October 2024 – Present

- Built and launched WordPress/Elementor websites for clients including Fillin (formerly Engen Mauritius) and the Artemis Hospitals Mauritius network, from custom theme and plugin development (PHP) through deployment (see portfolio - <https://dze-maestro.netlify.app>).
- Built CRM pipelines and automated nurture sequences on GoHighLevel for clients including Lifetime Immigrations and Lifetime Resettlement Services.
- Set up Google Analytics, conversion tracking, and third-party integrations to measure funnel and site performance.
- Improved page load speed and on-page SEO (meta tags, structured data, sitemaps) to boost client sites' search visibility.
- Diagnosed and resolved WordPress and GoHighLevel issues, including broken funnels, plugin conflicts, and tracking errors, through ongoing client support.

IT Support & Network Security Engineer Intern | eProcess Consulting Limited | Lagos, Nigeria

November 2022 – November 2023

- Provided first-line client support and maintained an IT inventory system for accurate asset management.
 - Configured web policies using Sophos Firewall and completed Sophos Firewall/Central certification courses.
-
